

37335

1. I reside at 4104 Russell Lane, Springfield,  
(Panama City) Florida.

2. I was employed as Plant Manager at the National Gypsum Company plant in Millington (Passaic Township), Morris County, New Jersey from May 1953 to December, 1953 during the illness of George Riley. I was subsequently employed by the Company as Production Manager from 1959 to 1971 and Engineering Manager, Fiber Process, from 1971 to 1976 when I retired. I was at all times from May 1953 to 1975 in close touch with the Millington plant.

3. At the time that I arrived at the plant in May, 1953, a waste deposit was evident on the property adjacent to the Passaic River. We did not add to the waste deposit but rather planted foliage over and around the mounds to make the appearance more in keeping with the immediate area. A small area between the waste pile and the plant was used for settling lagoons. The solid waste was allowed to settle in these lagoons and subsequently clamshelled to trucks and hauled away. The clear water from the lagoons was then discharged into the Passaic River.

Sworn to and subscribed  
before me this 27<sup>th</sup> day  
of September, 1977.

E. C. Dobbs
